Subject: San Jacinto Waste Pits Community Awareness
Date: 07/13/2010 11:30 AM

Folks,

During the June 30 Community Awareness Committee conference call, several Committee members expressed a desire to directly participate in the San Jacinto Waste Pits site Community Engagement Initiative. Part of this initiative involves participation of community groups not reached in the usual community contacts we make. There are a number of social and service organizations in the communities that surround the San Jacinto site that we would like to communicate with about site related issues.

You all know your areas' regional contacts and are the key resources to know the best groups to involve. Would it be possible for each of you to provide me with names of organizations and the respective contact names/phone numbers/email addresses, which would most directly benefit from involvement in these activities? Please don't include local schools or media outlets as they are part of our normal community outreach activity. If any of you are aware of sporting clubs, local business or union associations, Chambers of Commerce meetings, Black, Asian or Hispanic organization, etc., their contact information would be valuable. If possible please send me this information by Monday, July 26.

Once we have worked with the Site's Remedial Project Managers availability, we can begin to schedule the appropriate community engagement activities with the contacts and groups. It would be fantastic if we could start this phase of the outreach in August so that it is timed with the "survey" we are undertaking. Please call me at 214.665.8157 if you have any questions.

Thank you in advance for your support in this effort.
